

# Bima Santoso

## Backend Engineer - Target Job: IT00001 Backend Engineer

Jakarta | bima.santoso@email.com | +62 811-2200-8844 | github.com/bimasantoso

### PROFESSIONAL SUMMARY

Backend engineer with 5 years of production experience building high-traffic marketplace services. Strong in Golang, PostgreSQL, Redis, Kubernetes, microservices, REST API, event-driven architecture, distributed systems, Kafka, gRPC, Prometheus, Grafana, and ELK observability.

### CORE SKILLS

Golang, PostgreSQL, Redis, Kubernetes, Microservices, REST API, gRPC, Kafka, Docker, Event-Driven Architecture, Distributed Systems, Prometheus, Grafana, ELK, Unit Testing, Code Review

### PROFESSIONAL EXPERIENCE

#### Backend Engineer, PT Tokopedia Partner Platform

Feb 2021 - Present

- Designed and implemented Golang microservices for order, payment, and catalog APIs serving millions of daily marketplace transactions.
- Optimized PostgreSQL queries and indexing strategy, reducing p95 latency on high-traffic REST API endpoints from 420 ms to 150 ms.
- Implemented Redis caching layer and cache invalidation patterns for product and promotion services.
- Built event-driven workflows with Kafka and gRPC integrations to improve eventual consistency across distributed services.
- Deployed services to Kubernetes clusters with CI/CD, readiness probes, autoscaling, and observability using Prometheus, Grafana, and ELK.
- Led code review, unit testing, and incident postmortems for production systems with regional engineering stakeholders.

#### Software Engineer, PT Traveloka

Jul 2019 - Jan 2021

- Built REST APIs in Golang and maintained PostgreSQL-backed booking services.
- Collaborated with DevOps on Docker deployments, monitoring dashboards, and release reliability.

### EDUCATION

Bachelor of Computer Science, Institut Teknologi Bandung, 2019

### CERTIFICATIONS

Certified Kubernetes Application Developer, Confluent Kafka Fundamentals, AWS Cloud Practitioner
