

Nadia Lestari

Backend Platform Engineer - Target Job: IT00001 Backend Engineer

Surabaya | nadia.lestari@email.com | +62 813-9911-2044 | github.com/nadialestari

PROFESSIONAL SUMMARY

Backend platform engineer with 4 years of experience in high-traffic fintech and marketplace systems. Expert in Golang, PostgreSQL, Redis, Kubernetes, microservices, REST API design, distributed system concepts, CAP theorem tradeoffs, eventual consistency, message queues, Kafka, gRPC, service mesh, Prometheus, Grafana, and ELK.

CORE SKILLS

Golang, PostgreSQL, Redis, Kubernetes, Microservices, REST API, Kafka, gRPC, Message Queue, Service Mesh, Distributed System, CAP Theorem, Eventual Consistency, Prometheus, Grafana, ELK, CI/CD

PROFESSIONAL EXPERIENCE

Backend Platform Engineer, PT GoTo Financial

May 2021 - Present

- Built Golang microservices for wallet ledger, merchant settlement, and transaction reconciliation with event-driven architecture.
- Designed REST API contracts and gRPC internal services for high-throughput financial transaction flows.
- Improved PostgreSQL partitioning and query plans for transaction history endpoints, increasing throughput by 2.4x.
- Implemented Redis caching and rate limiting for high-traffic endpoints during campaign peaks.
- Operated Kubernetes workloads with CI/CD pipelines, HPA, rollout strategies, and service observability using Prometheus, Grafana, and ELK.
- Applied distributed system principles including CAP theorem, eventual consistency, idempotency keys, retries, and dead-letter queues.

Backend Developer, PT Xendit Indonesia

Aug 2019 - Apr 2021

- Developed payment REST APIs in Golang with PostgreSQL persistence and Kafka-based asynchronous processing.
- Performed code review, wrote unit tests, and partnered with DevOps for production deployment and incident response.

EDUCATION

Bachelor of Informatics Engineering, Institut Teknologi Sepuluh Nopember, 2019

CERTIFICATIONS

Kubernetes and Cloud Native Associate, Golang Backend Engineering Bootcamp, Kafka Developer Essentials
